

BRONZE BUSHINGS

Our Bronze Bushings are crafted from premium continuous cast bronze and engineered for lasting performance across a wide range of applications. We offer several material grades to meet different performance requirements, including **LG2 C83600**, one of the industry's most widely used grades, ideal for medium-strength and relatively light-duty applications. For heavy loads and high-speed operations, we supply **PB1 Phosphor Bronze**, renowned for its exceptional durability when paired with proper alignment and lubrication. Where elevated temperatures and demanding conditions are involved, our **AB1 Aluminium Bronze** provides excellent strength and wear resistance, ensuring reliable performance even in challenging environments.

Shock & Impact Resistant

Excellent Resistance
to Wear & Tear

High Load Capacity

Low Friction
